

ULTRASONIC CLEANERS: WASHING SOLUTIONS

SMEG offers a range of ultrasonic cleaners suitable for washing delicate instruments, instruments with special shape or used in contact with materials difficult to be cleaned. Our ultrasonic cleaners have different sizes in order to better satisfy washing needs. Their use is easy and intuitive. The stainless steel they are made of will make their cleaning simple and quick. It is possible to connect the drain to the rear in order to guarantee greater autonomy of use.

On the front side of this appliance you will find knobs to adjust cleaning time and temperature, as well as buttons to choose special cleaning functions (DEGASS, SWEEP, BOOST).

DEGASS: thanks to this function degassing is rapid and without bubbles. Its cleaning is quick and effective.

SWEEP: it facilitates homogeneous distribution of ultrasonic waves into the liquid. This ensures a better cleaning.

BOOST: it dissolves harder impurities using a higher ultrasonic frequency.

TECHNICAL DATA

Models	Litres	Frequency	Drain	Heating	Internal dimensions (l x w x h)
VU03H	3 LT	38KHz	NO	YES	240 x 137 x 100 mm
VU06H	6 LT	38KHz	YES	YES	300 x 151 x 150 mm
VU13H	13 LT	38KHz	YES	YES	300 x 240 x 200 mm
VU30H	30 LT	38KHz	YES	YES	505 x 300 x 200 mm
VU45H	45 LT	38KHz	YES	YES	500 x 300 x 300 mm
VU90H	90 LT	38KHz	YES	YES	600 x 500 x 300 mm
